Summary

Skilled programmer in Javascript, React.js, and PHP. I will not rest until all your bugs have been squashed, and your codebase is fully optimized. I have built custom fullstack applications and REST API's for the construction and real estate industry!

Online portfolio with all in depth project details: <https://abeschur.netlify.app/>

Github: <https://github.com/KravMaguy>

Codewars: <https://codewars.com/users/abe%20s>

What I've Built :

- Software design and full automation of real estate business logic in a Javascript React.js and firebase progressive web app, with IVR voice system scheduling, coupon generation, web push, twilio SMS, sendgrid, and PayPal integration

<https://leasewarehouses.net>

- A free listing platform for commercial real estate similar to costar loopnet. Built from scratch in PHP, MYSQL, and Javascript. Any user can sign up and list spaces

<https://listing-app.com>

- Various plugins and integrations for the the Wordpress environment
- Various creative coding projects with CSS animations and effects
